

R16
RADIO PANEL

MADE IN AUSTRALIA

FULLY WIRELESS, SELF-CONTAINED RADIO CONTROL PANEL

The Ness R16 is a unique fully self-contained radio control panel.

The R16 has a built-in keypad for programming and user operation, a built-in piezo siren, built-in LCD display, built-in radio receiver, built-in battery backup and built-in dialler.

The R16 supports up to 16 Ness radio PIRs and up to 14 Ness Radio Keys. All Ness supervised and encrypted radio devices are supported. There is even a Doorbell feature with selectable tunes when used with the Ness Radio Doorbell transmitter.

In addition to the 16 radio zones, the R16 has 1 hardwired zone and 1 hardwired tamper input.

The built-in piezo siren provides high volume audible warning. The R16 also has Siren, Piezo and Strobe outputs for additional hardwired noisemakers.

The built-in dialler uses Contact ID format for central station monitoring as well as audible monitoring to any telephone. The user can also dial into the system for remote arming and disarming over the telephone line.

The R16 is designed with low power considerations in mind - for use in areas where mains power may be intermittent. In the event of mains failure, the onboard backup battery can provide a full 48hrs operation including one full alarm.

- 4 BUTTON PORTABLE TRANSMITTER
- ARM / DISARM / PANIC / AUX
- FULLY WATERPROOF
- LONG LIFE LITHIUM BATTERY POWERED
- COMPATIBLE WITH ALL NESS RECEIVERS

NESS RK4 RADIO KEY
